

TRIO LIET is producer of feeding equipment for dairy farms and we are looking for a long term cooperation with metal working companies in Ukraine.

What metal processing techniques supplier must have:

- Plasma/ gas cutting
- Sheet metal bending. Preferably CNC controlled
- Turning/ Milling
- Sheet metal rolling (up to 3000mm width)
- Welding (mainly carbon steel)
- Steel shot/ sand blasting
- Painting (two components “wet painting”)

What we offer:

- We supply with all necessary technological equipment for welding (welding jigs)
- We bring our engineers to educate suppliers how to weld in those welding jigs and build number of our items together with supplier
- We are looking only for long term (10+ years) cooperation. Our products are not affected by the seasons. I mean we have orders running all round the year.
- Other products in case of successful business
